

## Vintage Airplane Smoking set with Many Pieces, similar to German Cocktail Shaker, Needs TLC

**Availability:** Out Of Stock

**Price:** \$770.00

### **Short Description**

Great if you're missing pieces.

### **Description**

This is a traveling set shaped like an airplane where all of the components relate to smoking. It would be good to have repaired or for spare pieces if you are missing any. The gondola with wheels is missing and I have added a brass colored one. It appears that all other pieces are there but one "wing" has detached from the part that slides to the body.

The propellor is a cigar cutter, four ashtrays nestle together, a match holder etc. Please look at the pictures for the best description.
